Water Colors Depict Points of Historic Interest.

Water colors by Mile, Germaine Tailur, who comes to America with an induction by Mme. Clemenceau-Jacque aire, daughter of the great Cleme eau, are on view in the Arlington Gal-eries. Mile, Tailieur is a landscapes and flower painter in water colors. She has the usual French directness of method and evidently plans her work well before beginning it, as there is no fumbling in her touch. In water colors nothing is so disagreeable as indecision.

The artist has recorded, for the pleas ure of tourists, glimpses of many favo-rite spot in Fontainebleu, such as the Carp Pond, the Cascades, the "Parterre and Door of Henry II.," the Avenue de Maintenon and the Bassin de Breau. The Paris subjects include the Tulleries Gardens, the Pont Neuf and the Luxembourg Gardens. Of especial interest at present are certain drawings made in the American sector of the war country such as Chateau Thierry, the village of Vaux, Bellau Farm and the Cathedral

The exhibition has been arranged un der the patronage, among others, of Gaston Liebert, Duchess d'Uzes, Baronne d'Halewyn, MacDougail Hawkes, Iselin and E. Peixotto.

Ex-Senator William A. Clark Lends French Examples From His Collection.

collection of ex-Senator William A. Clark have been placed on exhibition in the gallery of the Lotos Club and were viewed last night by the club members and invited guests. There are groups of works by Corot, Cagin and Monticelli, and with them is shown one magnificent landscape by Theodore Rous-

Seymour de Ricci, who writes the inroduction to the catalogue for this exhibition, holds that the French regard Corot as the greatest painter of the nineteenth century. Certainly his fame has been extended throughout the world as well as any man's, and the name "Carot" is a household word. His paintings, however, are not general household possessions, and it will astonish those who inspect this collection to find that Senator Clark owns twenty-two examples. It is undoubtedly true, as Mr. Ricci says, that this group of Co-

rots must rank next in importance to the great group of ninety in the Louyre. Mr. Clark's group shows the poet painter at his best, from the time of the early Italian views to the later great canvases that emerged from the studio of Ville d'Avray. Early in the series the famous pearly gray tones begin to assert themselves in the artist's palette and the atmosphere which Corot is said to have "invented" is apparent in all. Among the great canvases are the "Rondes des Nymphes," "La Danse" and several works like "Le Bord de la Riviere," in which the favorite device of looking through arched tree trunks at a broad river is employed. There are in-cluded a number of Corot's much ad-mired figure pieces, headed by the "Laveuse," a superb reclining, outdoor, nude. The Monticelli paintings in the Clark ollection excel even those of the Louvre, and it is a rare privilege to study them. As in the case of Corot, all evolutions of the painter's style are presented. There are early panels in which there is plenty

of realistic light and shade and later works in which realism is flung by the board for the sake of a riotous revel in color. These often take on the quality of enamels and seem to have been fused into harmony in a furnace. Monticelli's in some ofthese instances is wholly The "Fete au Parc" and "George Sand
